OUR
COMPANY

THE COMPANY IN BRIEF

Wild East Mountain is created and run by an active and highly motivated team of professionals whose main focus is to provide high-quality services at competitive prices. Since the foundation of the brand, we have created, launched, run, etc. many services and campaigns for our customers internationally.

We abide by the on-time customer support, exceeding expectations, the flexibility to the needs and the goals of the customers and achieving high results. We invest in research and development, processes and technologies, as well as in our professional team who are at the foundation of every successful project with their energy, competence and professionalism.

Over 7 years of experience

We are proud of all the projects implemented throughout the years and all our satisfied customers in the process.

Over 800K lines of code

The lines of code, number of designs, amount of calls, e-mails and hours of work cannot really be measured, but let's say this is an estimate.

50% growth in 2019

During 2019 our projects and business have significantly increased mainly due to word of mouth. Thank you!

WHAT SETS US APART

QUALITY

We have the honour and privilege to work with very talented, motivated and creative professionals who deliver great quality to our customers.

COMPETITIVE PRICES

We are lucky to be positioned in a very well developing Eastern European country where professionals offer great skills for reasonable prices.

PROFESSIONALISM

We never stop learning and we try to learn from the best practices around the world. From technical skills to people skills, you name it!

AVAILABILITY

We are always on top of our projects with timely replies, creative ideas, good advice, impressive customer support and much more.

OUR PHILOSOPHY

Mission

Help companies have access to high quality marketing services for reasonable prices.

Vision

The world is full of undiscovered potential. We can help uncover some of it.

Values

- Professionalism is a must;
- There is always a solution or an alternative;
- Happy customers and happy employees.

WEB DESIGN AND WEBSITE BUILDING

In today's digital landscape of the business world, every company needs a stunning website. It represents your business and works as a modern business card. If you want to become competitive on the market you need to have great functionality combined with modern and catchy design. Our professionals will live up to your expectations creating a personalised design which will fulfil your goals and wanted results.

WEBSITE MAINTENANCE

In order to retain your business on leadership positions you need to keep your website updated and responding to changing consumer expectations. Website maintenance and support is the act of regularly checking your website for needed updates, uploading new content and keeping it up-to-date and relevant. The key to success is the modernisation on a consistent basis in order to keep your website in good condition. The team of “Wild East Mountain” promises to create the best solutions for you .

A photograph of a desk setup. In the foreground, a laptop sits on a white desk. The laptop screen displays a large gear icon with the letters 'CMS' inside it. To the left of the laptop is a copper-colored alarm clock. To the right is a small potted plant with green grass-like leaves in a silver metal pot. Behind the desk is a white pegboard with various items hanging from it: two white cup holders filled with pens and pencils, an orange spiral notebook, and a small white shelf with a candle and some small containers. The image is framed with a green geometric shape at the bottom and a white geometric shape at the top right.

CONTENT MANAGEMENT SYSTEMS

If you prefer to have the opportunity to manage the content of your website by yourself we can provide this level of control to you by offering a CMS solution. A content management system (CMS) is an application that is used to manage web content, allowing multiple contributors to create, edit and publish. Content in a CMS is typically stored in a database and displayed in a layer-based presentation.

GOOGLE ADS SERVICES

Whether it is a business to business or a business to consumer product or service, Google Ads can be a great tool for improving your sales and reach. People use Google with a certain intent and with our campaigns we can filter this intent out of the keywords that users choose. We can pinpoint the campaigns on specific terms with specific intent to be as relevant as possible. For us it is super important to produce the right keywords and increase your results in a short amount of time.

SOCIAL MEDIA STRATEGY AND MAINTENANCE

Your social media channels should always be completely congruent with your brand and should operate in campaigns that enforce the marketing goals that are targeted, as well as connect directly with your desired audience. Our experienced team of web experts go over and beyond your expectations to deliver fresh, relevant, newsworthy strategy for your brand each and every day. Social media management is beyond important today.

E-MAIL MARKETING

If you want to successfully communicate with your customers through email marketing, you already have great options for doing so and we can help you with our professional experience. E-mail as a communication channel is still highly underestimated, although it has the highest return on investment. Rely on us for both end-to-end B2C email campaigns and B2B professional email marketing.

GRAPHIC DESIGN

In today's world of modernisation and digitalisation visual arts play an important role in the marketing of your brand. We understand and analyse the business needs of our clients and offer them the best graphics accordingly. You can give us your ideas and we will make sure to give them life. Or we can give you our ideas based on your goals. We believe that design has the ability to change the perspective of the world for the better.

VIDEO PRODUCTION

Professional web videos are compelling, relevant, and effective at building trust with your clients. It is no secret that products are more likely to sell when there's video content backing them. We know what impact a single, well-shot video can have on your bottom line. The specialists at Wild East Mountain are experienced in producing high-quality, professionally edited videos for a broad range of corporate and personal projects.

COPYWRITING

Copywriting is a proven way to increase brand awareness and to persuade people to take action in the process of buying products or services. The core of copywriting is the act of writing text for the purpose of advertising or other forms of marketing. The generated product is called a copy and may contain keywords which will help in the overall efficiency of the company's web presence.

MARKETING RESEARCH

Our belief is that marketing research must be as fast-moving, dynamic and ever changing as is today's consumer-centric tech-world. It is important to embrace new consumer technologies and apply them as tools and methodologies so that we can reach people and communicate with them in new and more relevant ways leading to better insights and understandings. If you understand your customers they will come to your business.

RAW DATA ANALYSIS

Data analysis covers everything from reading the source methodology behind a data collection to creating a data visualization of the statistic you have extracted. All the steps in-between include deciphering variable descriptions, performing data quality checks, correcting irregularities, reformatting the file layout to fit your needs, figuring out which statistic is best to describe the data, and figuring out the best formulas and methods to calculate the statistic you want.

MARKETING STRATEGY

In order for marketing tools to be truly effective, it is important that they are integrated into a comprehensive and well-functioning marketing strategy. This ensures maximum results based on the goals set. We at Wild East Mountain have the necessary experience and professionals in different areas of the marketing world to prepare the most comprehensive strategy adapted to the specifics of the client and his potential consumers.

YOUR TRUSTED ADVISOR

Always at your side!

All successful managers and businesses need good financial knowledge.
They don't need to invest in learning by mistakes.
They can merely find a reliable partner to show them the way.

Clients are our Partners

The success of our clients is a top priority. We desire is to become a solid partner to any intelligent business who will inspire our high-performance culture.

Sustainable Growth

Focus on client's long-term financial strategy, that will bring strong sustainable results. We act with integrity and due care to gain client's confidence and become the recommended trusted advisor.

Individual Approach

Being ahead means taking new paths and facing new challenges. The road to success is always different. That is why we approach each project individually with high professional care.
